

Fullstack Java Developer (m/f/d)

Why not come and join us?

We help our international customers to secure and support the success of their business processes and decisions with well-maintained and correct data. In addition, we support them to implement the demanding legal requirements for data protection correctly and effectively. For this purpose, we rely on an extensive product range to meet the multitude of different requirements. To strengthen our development team, we are looking for colleagues who are committed and can contribute their own ideas to help us continuously improve our product portfolio.

What do we offer you?

- An open, pleasant working atmosphere in the heart of Stuttgart with excellent transport links
- A thorough induction into your tasks under the supervision of an experienced colleague
- Flexible, family-friendly working hours
- The chance to take on responsibility and develop your career in a permanent position
- Attractive employee offers

What will be your tasks?

- Software development with Java in the context of product development, customer projects and internal tools
- Designing and implementing internal and external interfaces with REST
- Thorough quality assurance through automatic and manual tests
- Documentation in manuals and internal wiki (Confluence)
- Quality assurance and testing
- Participation in an agile development team using the project management tool JIRA
- Contribute to the optimisation of tools and methods in the projects

Job requirements:

- Degree with a focus on computer science or comparable qualification
- Good knowledge of software development with Java
- Knowledge of the procedures/processes in software development
- Knowledge of working with Unix and relational databases
- Experience in using common software development tools (e.g. Eclipse etc.)
- Understanding of distributed systems and model-view-controller approaches
- Basic knowledge of MS Office
- Ability to familiarise yourself with complex topics and new technologies
- Good knowledge of the German and English language, both written and spoken

Requirements for personal working methods:

- Careful, reliable and accurate way of working
- Independent and forward-looking action
- Enjoy open and cooperative teamwork
- Good manners and a confident manner towards customers
